

Contour RollerMouse RollerWave2

Get even more comfort with additional palm support

RollerWave2 is our extended palm support that provides even more comfort for your forearms while working.

It only fits the RollerMouse Pro2.

The soft inner core is similar to memory foam and is covered with durable leatherette, giving a soft support to both hands and underarms and distributing pressure over a wider area. RollerWave2 is an accessory and the ultimate companion to a RollerMouse Pro2.

When bigger is better

RollerWave2 offers a longer and smoother transition from desk to RollerMouse and keyboard because it is larger than the regular wrist rest on Pro2.

This means hands and arms can rest more flat, and thus more natural without tension. RollerWave2 promotes an even better and more ergonomic working posture. RollerWave2 also provides additional comfort for computer users with larger hands and longer fingers.

The difference RollerWave makes

RollerMouse Pro with out RollerWave

With a RollerWave2, the arms and wrists can rest and lie more flat while working.
