

Penclic Mouse B3 - Bluetooth

Penclic Mouse with 3 buttons and Bluetooth connection

The third generation Penclic Mouse is compatible for left- and right-handed users, with the scroll wheel located in the middle of the pen's shaft. The scroll wheel also doubles as the middle click button.

Perfect precision and speed is now at hand

Penclic Mouse looks, feels and moves like a pen. It offers simplicity and the ability to utilise and benefit from the fantastic natural control we have in our fingertips and hands.

The high precision allows for movements and abilities unlike any other computer mouse on the market, providing an amazing user experience.

Penclic Mouse counteracts static tensions in your arms, shoulders and neck.

Create a perfect working position

Penclic Mouse allows the forearm to rest on the work surface which reduces strain and pain. The cursor can be moved all over the computer screen quickly and effectively.

The Penclic Mouse allows the user to work in front of and beside the computer.
