

DocuGlide Plus

Ergonomics and design in the workplace

The new DocuGlide Plus stands for modern design combined with ergonomics and functionality. Combining the functions of a document holder and a writing slope, the DocuGlide Plus also includes many storage options.

Product Code:

DGLPLUS

Maintaining and promoting health

Working ergonomically with the DocuGlide Plus makes it easier to capture texts and documents thanks to the optimal viewing angle. The DocuGlide Plus supports a healthy sitting position and at the same time works actively against back and neck problems.

Avoid mistakes, increase performance

DocuGlide Plus promotes concentration and increases performance. By positioning the documents in line between the monitor and keyboard, input errors are avoided.

Documents are at the optimal viewing angle between the keyboard and monitor. Text can be read without turning your head or straining your eyes. The DocuGlide Plus can be pulled over the keyboard to be used as a writing platform without having to move the keyboard.
