

A multifunctional tablet stand that is thin, light and portable

Anyone using a tablet computer will be familiar with the uncomfortable feeling of not having any support for the hands or wrists whilst typing, or having the screen too low whilst viewing the screen. The Perch addresses both these issues.

The Perch provides two settings options, the **Typing** setting for direct interaction with the tablet, and the **Viewing** setting as a height and angle adjustable stand.

Typing setting

Viewing setting

Product Code

OPC117P

Typing setting

In this configuration, the Perch stand offers the user the unique ergonomic and comfort benefits of a built in palm and wrist support, whilst also lifting the screen to an improved viewing height and an angle of 22 degrees.

Viewing setting

With a choice of two height settings and 5 angle settings, in this configuration, the Perch stand offers the benefit of raising the screen height for use with an external keyboard, video conferencing or viewing videos/documents.

The two height settings also offer the additional benefit of keeping two mobile devices inline.
