

A light weight and compact travel companion

The Ergoapt Roam Stand assists users working on the go with creating a ergonomic setup. The Ergoapt Roam's aluminium construction is lightweight for ease of portability, while providing a stable platform for laptops up to 15.6 inches.

When not in use, the Ergoapt Roam Stand folds flat to a low profile. This slim size makes the Ergoapt Roam Stand convenient to store, transport and use.

Product code

OPC178

Work comfortably wherever you are

Used in conjunction with an external keyboard and mouse, the Ergoapt Roam Stand's 8 levels of angle adjustment, allow for ergonomic setup while working on a laptop.

The adjustability allows for the raising of the laptop screen to a height, preferred distance and angle that reduces neck strain and improves posture for individual statures and makeshift workstations.

Manufactured to support and travel

The Ergoapt Roam Stand is constructed of aluminium, delivering strength and stability when in use, without adding additional weight when transporting and traveling.

The rubber pads on the base of the Ergoapt Roam Stand provide a non-slip platform for the Roam Stand to rest on. Pads on the Roam Stand frame provide a non-slip surface for the laptop to rest on whilst the rubber shelf provides a secure base to position and support the laptop.

Features

- Aluminium construction
- Rubber anti-slip pads
- 8 different adjustments that allow for an angle range of 18° - 45°
- Height range of 105mm – 175mm when setup
- Folds flat when not in use
