

Kinesis Mechanical Keypad for PC

Low-profile numeric keypad with Freestyle2 styling for 10-key users. Includes convenient Windows hotkeys for Cut, Copy and Paste.

Product code

AC210USB-blk

Cherry MX Mechanical Switches

The keypad utilises Cherry MX Brown mechanical key switches, the same low-force, tactile mechanical key switch used in the Advantage2 and Freestyle Pro keyboards.

Mechanical switches are spring-loaded for a quick rebound to improve both speed and accuracy, and are rated for 50 million keystrokes for unmatched durability.

Ergonomics behind a stand-alone keypad

Using an external keypad is ergonomically sound, allowing flexibility in positioning when in use to the right or left of the keyboard, or between the key modules of a split keyboard.

When not in use, move the keypad out of the way and enjoy more desk space and closer mouse placement.

Specifications

Compatible Operating Systems

Windows

Key Switch

Cherry MX brown, tactile mechanical

Peak force: 44 grams

Activation force: 35 gram
