

Ergoapt Tower Laptop Stand

Designed for the Hybrid Worker

Hybrid workers operate from a blend of in office, remote and on the go workspaces. Ergonomics is creating the ideal fit between a worker, their environment and the tasks they perform. Investment in ergonomic workspaces improves worker comfort, leading to better health and productivity.

With the uptick of hybrid working, it is important that workers have ergonomic setups, regardless of their location.

This ensures the financial, health and productivity benefits of ergonomics are achieved.

Create an ergonomic workspace while working off site

The Ergoapt Tower is a portable laptop stand that is adjustable in height and angle.

The Tower has been designed to elevate laptops for improved viewing ergonomics.

With two high tension pivot points the ideal viewing height and angle can be achieved, improving comfort and productivity.

To ensure proper ergonomic positioning, the Tower should be used in conjunction with an external keyboard and mouse.

OPC17T

Product Code

Set and forget or pack away each day

Both pivot points offer almost 180° of angle adjustment which allows for a wide range of height and viewing angles which makes it suitable for a variety of users, laptops and workspaces.

With the wide range of angle adjustment, maximum height will vary from laptop to laptop so care should be taken when setting height and angle.

Once the ideal position is found the Tower can be left in position, or folded flat and stored.
