Kinesis Freeystyle2 Keyboard

A versatile, adaptable and ergonomic keyboard

The Kinesis Freestyle2 Keyboard is one of the most versatile keyboards available. The low-profile keyboard is divided into two separate modules connected by a cable.
The modular design allows the user to configure the keyboard in its optimal orientation, either by splaying the modules at any angle or by adjusting the distance between the modules. Kinesis Freestyle2 Keyboards are available in both PC and Mac configurations.

Kinesis Keyboard with 20cm separation

Kinesis Keyboard with 50cm separation

Product Codes

Kinesis Keyboard PC - 20cm: KB800PB-US

Kinesis Keyboard Mac - 20cm: KB800HMB-us

Kinesis Keyboard PC - 50cm: KB800PB-US-20

Features

- Narrow foot print for comfortable mousing and typing, reduces the need to overreach.

- Driverless Hot Keys are provided for commonly used mouse actions: Internet Forward, Back, Undo, Web Home, Cut, Copy and Paste.

- Both modules can be connected together by attaching the included the flexible Pivot Tether allowing an infinite range of splay.

- The splay and separation features accommodate all body types.

- The keyboard employs double-wide Delete and Escape keys, providing an easier target for fingers to locate.

- The compact design of the Freestyle2 eliminates the traditional numeric keypad on the right-hand side of the keyboard. In its place, the right half of the keyboard contains an embedded numeric keypad.
