

Microdesk Writing Platform

The Microdesk makes working easier and healthier

The Microdesk provides an elevated secondary work surface directly between the keyboard and the monitor. Designed by an experienced physiotherapist, the Microdesk reduces the amount of reaching/twisting/stretching that many people are forced to do when working with papers at their computer.

Incorporating the Microdesk into a workspace improves posture and productivity.

Models

Regular Microdesk

Code **AMD-A**

Writing platform for use with a flat desk top. Suitable for use with full sized keyboards.

Compact Microdesk

Code **AMD-COM**

For use with a laptop, docking station, compact keyboard or a confined work area.

Straight Sides Accessory

Code **ASS**

For use with a two level desk or a low monitor position. Fits both Regular and Compact
