

Kinesis mWave Mechanical Keyboard

The mWave Mechanical Keyboard reimagines the iconic 'sculpt' design, blending style, technology and functionality for an enhanced typing experience. Equipped with backlighting, seamless programmability, and an integrated keypad, the mWave offers both wired and wireless connectivity options. Available in layouts for Windows and Mac, the mWave retains the ergonomic benefits of the beloved sculpt keyboard design while enhancing functionality to meet the demands of modern users.

Powerful Dual Layer Layout

Featuring a tenkeyless layout, that provides all essential keys without unnecessary extras, including full-size function keys, arrow keys, and navigation keys like Home/End and Page Up/Page Down. An integrated keypad can be accessed using the Fn key, allowing for easy data entry without leaving the home row. Additionally, the keyboard includes 12 multimedia actions for convenient control right at your fingertips.

Fully Programmable

The new Kinesis Clique Programming Engine makes custom programming your keyboard easy. Just connect your mWave to a desktop PC with the USB cable and launch Clique using a Chrome or Edge browser. You can reprogram your keyboard in real-time and save your changes directly to the keyboard with the click of a button

Key Features

- Fixed Split Design:** Split design positions hands closer to shoulder-width in proper typing form to reduce ulnar deviation.
- Integrated Tenting:** Tenting elevates the thumb side of the hand to reduce forearm pronation caused by flat keyboards.
- Integrated Palm Support:** Velvety smooth, washable palm support promotes neutral typing position to reduce wrist extension.
- Compact Tenkeyless Layout:** Tenkeyless layout with embedded keypad results in a smaller footprint for closer mouse placement.
- Negative Tilt:** Attach the magnetic feet for a negative typing angle.
- Dual Connectivity and Multi Channel:** Connect via USB wired or Bluetooth wireless. Pair up to 2 Bluetooth devices and switch between instantly.
- Power Source:** The mWave can be powered via the included USB cable or via 2 AA batteries.
- Available Backlighting:** Connect the keyboard via USB to illuminate the key legends.

Compatibility

Plug-and-Play compatible with all USB operating systems: Windows, macOS, iOS/iPadOS, Linux, Android, Chrome
