

Kinesis Mechanical Keypad LP for Mac & PC

A Low-Profile, Quiet, Programmable Keypad

The Kinesis Mechanical Keypad LP pairs with any tenkeyless Kinesis keyboard. Featuring quiet low-profile mechanical switches, wired or wireless modes, optional white backlighting when used as a wired device, and full programmability via Kinesis Clique.

The Kinesis Mechanical Keypad LP boosts productivity without sacrificing ergonomics.

Product Code

KP150-LIN

Seamless Integration

The new Mechanical Keypad LP matches the low-profile design of the mWave Mechanical Keyboard. It utilises quiet low-profile “LP” mechanical key switches, the same choice of Wired or Wireless mode, available white backlighting over USB, and full programmability via Kinesis Clique.

Versatile Positioning

The Mechanical Keypad LP keypad allows flexibility in positioning the keypad to the right or left of the keyboard and is perfect for tenkeyless keyboards like the Kinesis mWave and Kinesis Freestyle, or even laptops. Use it in any situation where a stand-alone keypad is preferred.

Key Features

- Standard 10-Key Layout
- Integrated Palm Support
- Quiet Mechanical Key Switches
- Fully Programmable with Clique
- AAA Batteries Included

Plug-and-Play compatible with all USB operating systems

Windows, macOS, iOS/iPadOS, Linux, Android, Chrome
