

HandshoeMouse Original Large Wireless

An ergonomic mouse which fits like a glove

The design of the HandshoeMouse allows the entire hand to rest. The curved finger support follows the fingers' natural posture, a lower thumb platform ensures neutral thumb positioning and continuous palm support at a natural 25° angle, distributing pressure across the fingers, thumb, and palm to prevent overload of joints, and reduce strain.

Available in right-hand only, the HandshoeMouse Large offers dual connectivity, wired via USB cable and wireless via a 2.4 GHz USB receiver, and includes a rechargeable internal battery.

Product Code

BNEP210RW

Relieves your hand, fingers, and thumb

The HandshoeMouse's sculpted design supports the hand at a natural 25° angle so control comes from gravity rather than a static grip which reduces gripping or pinching. The tapered back reduces wrist extension by gradually inclining the hand and arm, discouraging wrist-only maneuvers. The ergonomic shape and angle position the forearm and hand to minimise static muscle tension, allowing fingers to remain relaxed and require only minimal movement for clicks while spreading cursor movement across the forearm and upper arm to reduce overall fatigue.

Key features

Sculpted design: The ergonomic shape positions the hand at a 25 ° angle

Reduces grip tension: The shape reduced gripping and pinching in the hand and wrist and encourages cursor movement to be made by the whole arm.

Dual connection modes: Wired (USB-A cable) and Wireless (2.4 GHz USB receiver). Includes an internal rechargeable battery.

Wired mode: When USB cable is connected, mouse operates as a wired device and charging occurs.

Wireless mode: When the USB receiver is plugged in and the mouse has power, mouse pairs automatically with receiver and operates in wireless mode.

Orientation: Available in right only.

How to determine if the Large HandshoeMouse Original is the right size

The HandshoeMouse Large model is suitable for hands that measure 190mm – 210mm from the tip of the ring finger to the first wrist crease.
